Executive summary of the Germany country profile (2026-10-30). Superscript numbers refer to the numbered sources in Germany_Profile_DRAFT_SOURCES.docx.

At a Glance

83.5 m Population, end of 2025, about[3]	**75,400** GDP per capita, PPP (international dollars), about, 2025[6]	**12.27%** Current health expenditure, share of GDP, 2024[32]	**10.7%** Out-of-pocket share of current health expenditure, 2024[34]
4.7 Physicians per 1,000 people, OECD, 2023[13]	**81.5** Life expectancy at birth, years, 2024[13]	**23.7%** Population aged 65 and over, 2025[11]	**US$6,849** Current health expenditure per capita, 2024, current US$[33]

Country background

Germany, a federal parliamentary republic of 16 Länder, has its capital in Berlin and had about 83.5 million residents at the end of 2025.[3] Federal President Frank-Walter Steinmeier is head of state, and Chancellor Friedrich Merz leads a CDU/CSU and SPD coalition.[7,8] Carsten Linnemann became federal health minister on 29 July 2026.[15] GDP was about 6.30 trillion international dollars (PPP) in 2025, or about 75,400 per person, after 0.2 percent real growth.[5,6,18] The population is aging: 23.7 percent were 65 or older in 2025, and life expectancy was 81.5 years in 2024.[11,13] The main risk is financial: the 2026 stabilization law answers a needed saving of almost €19 billion (US$21.3 billion) for 2027.[37]

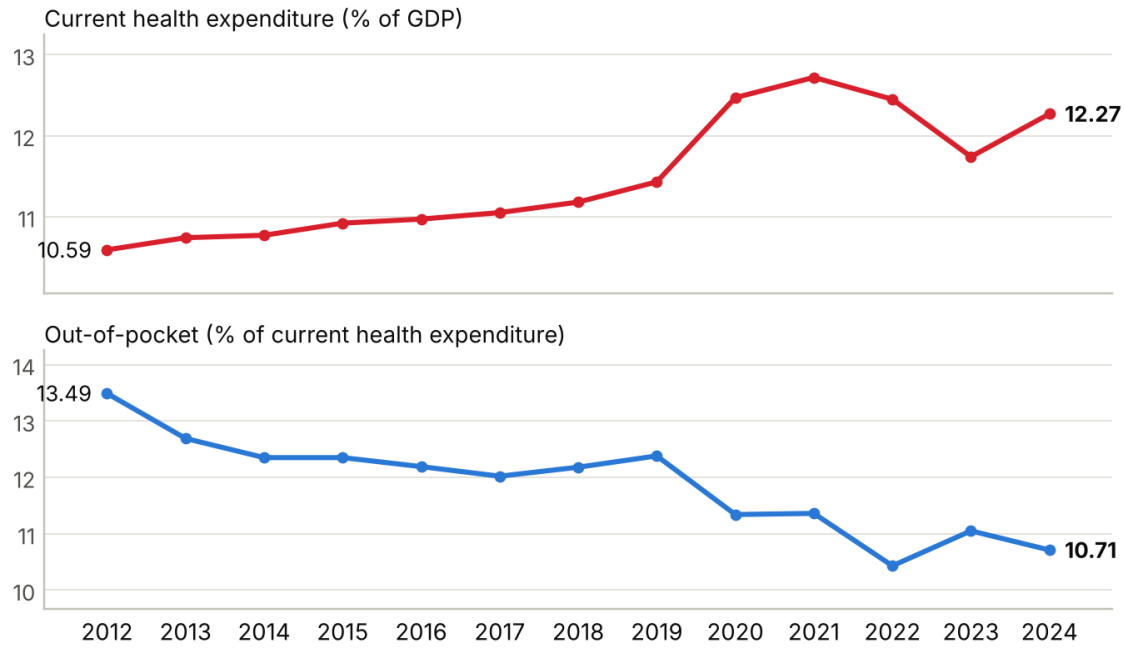

Key takeaways for CSI

- Health spending reached 12.27 percent of GDP in 2024, up from 10.59 percent in 2012; only the US spends more.[32,36]
- Public sources paid 86 percent of health spending in 2023, against an EU average of 80 percent.[13]
- The 2026 stabilization law answers a saving need of almost €19 billion (US$21.3 billion) for 2027.[37,44]
- The 65 and over share is projected to reach 28 percent by 2050; 49 percent have multiple chronic conditions.[13]

Health System

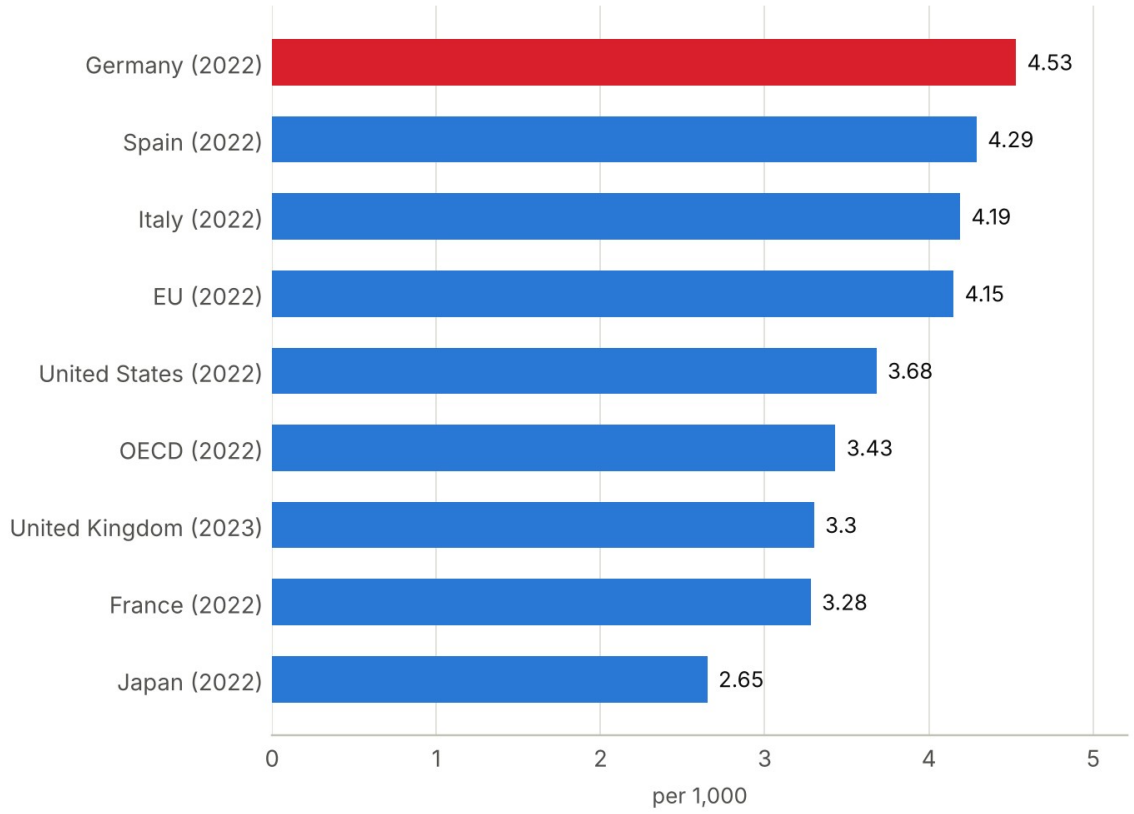

- Insurance is mandatory: an estimated 89.0 percent of residents had statutory cover in 2024, and 10.4 percent had private cover.[13]
- Germany had the EU's highest rate of avoidable hospital admissions for chronic conditions in 2023, at 810 per 100,000 people.[13]
- The 16 Länder plan hospitals, and reform adjustments delay full fixed capacity payments until 2030.[13,38]

Germany: health spending and out-of-pocket share, 2012 to 2024

Current health expenditure as a share of GDP, and out-of-pocket spending as a share of current health expenditure; 2024 is the latest year in the series. Sources: [32,34]

Physicians per 1,000 people, Germany and comparators (latest year available)

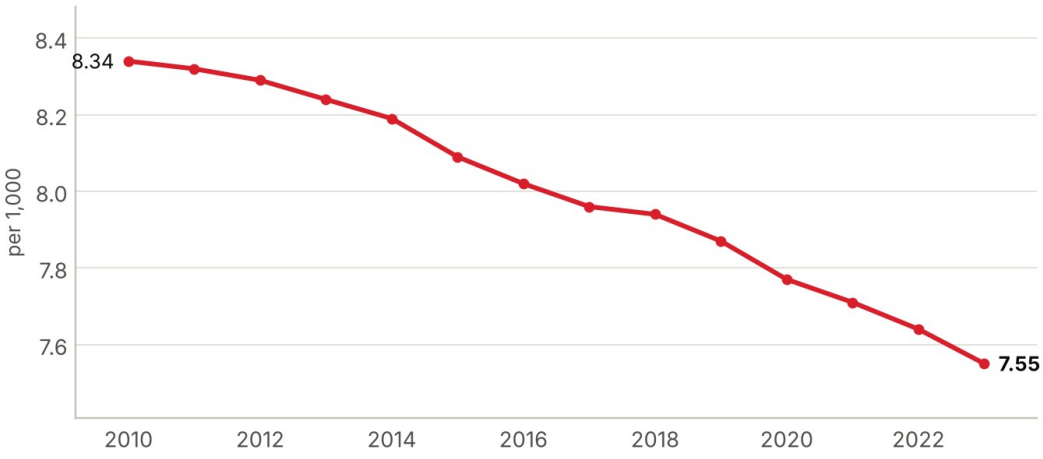

Latest year available for each country in the World Bank series, shown in brackets; comparison years differ (2022 and 2023). OECD and EU are group averages from the same series. Sources: [39]

Market and Competition

- In 2025 Germany had 1,807 hospitals: 729 private, 549 nonprofit and 529 public.[29]
- Helios, Asklepios and Sana lead by beds; Swiss-based Ameos and Turkey's Medicana took over hospitals in 2026.[30,47,48]
- About 182,200 patients from abroad were treated in 2022, three quarters from neighboring countries.[67]

Germany: hospital beds per 1,000 people, 2010 to 2023

Hospital beds as reported to the World Bank, public and private; 2023 is the latest year in the series. Sources: [41]

Foreign health systems active in Germany

19 foreign institutions with confirmed active partnerships (19 in all): 13 research collaboration, 3 ownership or management, 2 training and education, 1 clinical affiliation. Sources in the profile and the partnerships tracker.

Institution	Nature of collaboration
Duke University (Duke Global Health and School of Medicine)	Research collaboration

Institution	Nature of collaboration
Harvard University (including Harvard Medical School)	Research collaboration
Mount Sinai Health System (Icahn School of Medicine at Mount Sinai)	Research collaboration
Northwestern University (Feinberg School of Medicine)	Research collaboration
University of California San Francisco (Quantitative Biosciences Institute)	Research collaboration
University of Kansas (University of Kansas Medical Center)	Research collaboration
Vanderbilt University Medical Center (Vanderbilt Health)	Research collaboration
AMEOS Gruppe	Ownership or management
Institute of Science Tokyo	Training and education
Karolinska University Hospital and Karolinska Institutet	Research collaboration
Lithuanian University of Health Sciences (LSMU), Kaunas	Research collaboration
Medicana Health Group	Ownership or management
Medicover	Ownership or management
Medisch Spectrum Twente (MST)	Clinical affiliation
Samsung Comprehensive Cancer Center (Samsung Medical Center)	Research collaboration
Sheba Medical Center	Research collaboration
Tongji Hospital (Huazhong University of Science and Technology)	Research collaboration
West China Hospital, Sichuan University	Research collaboration
Zhejiang Cancer Hospital	Training and education

CSI Position, Risks and Recent News

CSI partnerships in Germany

[MANUAL INPUT REQUIRED]

To be completed by CSI from internal data; not researched.

Opportunities for CSI

[MANUAL INPUT REQUIRED]

To be completed by CSI from internal data; not researched.

Risks and watch items

- Statutory insurance finances remain tense, and structural problems must still be solved, the health minister said.[45]
- Growth is weak: GDP grew 0.2 percent in 2025, and the Bundesbank projects 0.5 percent for 2026.[18,21]
- Almost a quarter (23.4 percent) of working doctors were 60 or older in 2025.[31]

Recent developments

2026-10-14 Estimators expect the average additional contribution to stay at 2.9 percent in 2027, and Minister Linnemann called the situation tense.[45]

2026-07-29 Carsten Linnemann replaced Nina Warken as federal health minister, and Warken moved to head the Chancellery.[15,16]

2026-07-10 Parliament passed the contribution stabilization law, in force from 30 July, tying spending growth to income growth.[37,44]
